Enseignant-chercheur en architecture à l'université de Cardiff (UK), auteur de plusieurs ouvrages sur l'architecture.

I've been interested in architecture for quite a while now but hadn't found a decent resource (aside from combing through internet pages looking for exactly what I wanted) to help me understand it, with both the foundation and history of architecture as well as modern pieces. This book does just that - tells you 100 things that had a significant impact on architecture, why it made an impact, the history of it, etc.

The book describes one by one what the author thinks are the most important ideas that make dramatical changes in Architecture. The photos are great and some explanations could be deeper.

The size and weight are ok, to take it with you every where.

excellent book arrived in excellent condition

100 Ideas that Changed Architecture is a fantastic book. The authors have put in so much depth of thinking that I would have never even begun to think of.

haven't read it but good quality.

Got this as a gift for my retired father, an architect. This is a very comprehensive text of significant advancements in the "art" of architecture. Glad had it for such a great price!!

Purchased the book for my daughter who is studying Architecture in College. It should be on the list of "must buy" for anyone in the Architecture field

Really like the way this book takes the 100 ideas and gives a good synopsis of each with nice pictures.
