Textbook Of Complete Dentures

Synopsis

Initially written by Dr Charles Heartwell, this fifth edition presents the various aspects involved in the basic principles of complete denture prosthodontics. New to this edition are: illustrations showing the latest implants; updated terminology - more detailed anatomy; an added section on lingualized occlusion; revisions of chapters on anatomy and physiology, mandibular movements, hinge axis and facebow, maxillomandibular, and surgical preparations for complete dentures; a special chapter on articulators; and illustrations on implants. The book is technique-oriented and relates the basic sciences of anatomy, physiology, pathology, pharmacology and psychology with the art and mechanics involved in complete denture construction.

Book Information

Hardcover: 528 pages

Publisher: Lea & Febiger; 5 Sub edition (January 15, 1993)

Average Customer Review: 3.7 out of 5 stars 2 customer reviews

Best Sellers Rank: #2,584,654 in Books (See Top 100 in Books) #61 in [Books > Medical Books > Dentistry > Prosthodontics](#) #784 in [Books > Textbooks > Medicine & Health Sciences > Dentistry > General](#) #4354 in [Books > Textbooks > Medicine & Health Sciences > Medicine > General](#)

Customer Reviews

Excellent.

Some good info buried beneath a mountain of poor organization, archaic references, and unexplained concepts. Don't buy it.
