Mysterious. _____ THE TRUTH DOESN'T

ALWAYS SET YOU FREE! I've fallen hard for an alien, but he's harboring secrets. Massive secrets that threaten the very essence of humanity. How can I give him my heart when his race plans on taking my future? Sadie Owens has been slowly dying inside. Bit by bit, piece by piece, day by day. Trapped in a life she hates, she relies on only one person--herself. Despised by her family and betrayed by an unscrupulous government, Sadie dreams of a different life. When she is chosen to participate in the government's new social experiment, she is ecstatic at the prospect of spending six months in Thalassic City, the shiny new city under the sea. Immediately drawn to Logan Chandler, Sadie is captivated by the beautiful boy with the ocean-blue eyes. Logan seems to embody everything that has been forbidden, but he isn't all he appears to be. Confused over Logan's true intentions and concerned when best friend Jenna starts transforming in front of her eyes, Sadie partners with newcomer Jarod in a bid to uncover the government's real agenda. The truth is more shocking than anything she could ever have imagined. When Sadie finally understands why the Saven walk among us, will it be too late to save her heart and the human race? Customer Reviews

Hi began reading this author with her Tru Calling series. I love the young adult romance but not necessarily the sci-fi theme. Siobhan has made me a lover of that now. I did find it difficult in the very beginning of the book to follow, just because there was world building, character building, but I had no idea why the world was the way it was. However, I feel that that worked in my favor because it allowed me to be surprised as the plot developed. Once that happened, I finished the book in a very short period of time, I just couldn't put it down! The writing is so well-done that it transports you to that world, putting you in place of the characters. It's truly captivating and extremely enjoyable, and leaves you wanting more. I fell in love with Sadie, and even watched her character developed into somebody stronger during the story, and this is just the first book! While I'm very interested in her and Logan and how the relationship will develop, I also find myself invested in secondary characters, and that doesn't happen often in a book. These characters paid such intricate rolls and woven so well with your main characters that it's almost like a second story within the story. The

romance is sweet, has its own ups and downs, but romance is always my favorite part of the book and I got plenty in *Saven Deception*. I embraced the Eterno connection. It makes the romance more intense! However, romance isn't all this book is about. There is corrupt governments, aliens living among them without knowing, mystery and intrigue and keeps you wondering what is going to happen next. I love that Siobhan does not leave her books with huge cliffhangers. I will come back and read any additional books in the series if the series is written well. I'm not a big fan of cliffhangers that leave you waiting with characters hanging in the balance. I also appreciate that I do not have to wait for a year to find out what's going on in the story. This makes Siobhan one of my favorite writers, not just because her books are wonderful and creative and romantic but also because she respects her readers enough to work hard on getting her books out in a reasonable amount of time. I'm very excited about seeing what happens in the second book, and how these characters continue to develop and change their world with the surprises, and plot twists I can't begin to imagine what will happen next. I give my highest recommendation, not only the *Saven* series, but the *Tru Calling* series. If you haven't read that series yet, I suggest you buy that now and read it while you're waiting on the next book to come out in the series. You won't be disappointed!

I don't know what to say about this book that would do it justice. I thought that Siobhan wowed me with her *True Calling* series, but this one has me so sucked in and I didn't want to come up for air. You have suspense, Dystopia, sci-fi, romance, and friendship all wrapped into one. Most books that try to put so much in one book just cannot pull it off, but Siobhan did it with ease. I was able to follow through the book without having to question anything. It all made sense as I was reading. Even all the Alien things that pop up don't have anything to me that didn't make sense. I felt like I was right there with the characters. As I was reading, I had my own personal movie playing in my head. I was able to swoon and drool over Logan the whole time. I felt a deep pull towards Logan and could stare at him just like Sadie. He has so much mystery to his character yet so much sweetness at the same time. I can't wait to learn more about him and see how his character progresses. Sadie is a very strong willed character. You know she goes through so much at her old home and you can see her come out into a brand new person once she can get out and breathe. She starts to come out of her shell in a wonderful way. Most female leads are annoying and whiny, but she is anything but. I found myself so connected to each and everyone one of the characters in some way. I felt their emotions just as they did. Even Dante who I couldn't stand seems to have a hidden personality that I want to get to know. I don't know how Siobhan can write with such a flow, but she has easily stolen my first place spot for Favorite Author. Her characters have depth, her

worlds have such detail, and the ideas just make sense. The length of the book would usually make me worried about the slowness of it, but she doesn't have any of that. From the second you start reading you are drawn into the book and keep going until the last page. I read this book in between moving and I did all that I could to try to even get a page in here or there because I wanted to know what happened next. This was such a great read and I can't wait to devour the next book.

I have been a fan of X-Files since it first aired on television, and this book is right along those lines. I also loved Siobhan's True Calling series. It constantly had me guessing and creating ideas (some completely ridiculous) of what was going to happen, and I found myself doing the same thing while reading this. I kept finding myself going back and forth about the aliens, and I hate to admit it, but I am not as big a fan of Logan as I think I am supposed to be. I don't see their relationship being much different than Jen and Dante's. I understand that it is a soul mate thing, but Logan is going to have to build my trust throughout the next book. As with the True Calling series, I find myself rooting for the underdog--Jarod/Watson (not sure of his real name). I find him incredibly charming and endearing. He is so passionate about destroying the corrupt government while being tech savvy and highly intelligent. I would love to meet a guy that has a costume department in his home! Going on undercover missions would be so much fun, and I see him being more compatible with Sadie. However, there was the scene where Jarod says he liked Jenna, but I am not buying it. He saved Sadie first, and I think there is something going on there, or maybe I am just suffering from wishful thinking. Even though I am not on the Logan bandwagon yet, I still absolutely loved the story. I am so excited to see what happens next!!
