## Customer Reviews

Overall it was okay... Rating 3 stars because it arrived damaged slightly...Also it's ridiculous this book is this expensive and it's not even bound. I only bought this book because it's required. I wasn't about to spend another 50 bucks for binding.

The book's chapters give simplistic examples which makes it difficult to complete the more complicated homework exercises in the book or on an academic website.

The book was mis printed and whole punched in such a way that it didnt fit into any binder. I had already started class so didnt have time to return, but it was a huge inconvenience and not what I expected for the price I paid. I even tried several binders!

i took an online accounting course. And this book is the required textbook. I didn't buy the code, just bought the lose leaf book. My teacher was OK. I find the book to be quite informative, easy to comprehend, clearly organized, easy to follow, and interesting to read. Since I'm leading accounting from the beginning level, I enjoy reading about various aspects of the field. I also do the exercises at the end of each chapter. I decided to not continue the studying of accounting but will keep the book. And should I retake the class someday, I hope have a better teacher.

Expensive but worth the cost. Got the item the same day I ordered. No mess or wasting of time. customer service was awesome. Made sure the item matched the school's requirement on the book or free return.

needed for school, love this topic
