Then he discovered he REALLY hated it when it came to learning multiplication tables. So Harry's mum invented an ingenious way of remembering his tables by using rhymes and pictures. In TWO WEEKS Harry had all his multiplication tables down pat. Soon after, Harry's teacher gave the class a test. Harry finished it in five minutes and got every question right! News of Harry's Magic Tables spread like wildfire in his school. In no time, the book was shared with some lucky classmates, friends, cousins, and eventually complete strangers too! Now many happy children know their tables inside out - and so can you!

Customer Reviews

Learning times tables is often a chore for many children. They find it difficult to learn and some do not retain the information. Without a good foundation in maths, it is difficult for children to be able to fully and accurately learn other parts of mathematics. One of the many strengths in this book are the mnemonic rhymes they reinforce the cheerful graphics and colors and inevitably make learning fun. The material is useful and it is presented in a clear way which is easy to follow and precludes any confusion. This little book accomplishes a lot demystify the complex world of multiplication for 7/8 year olds. It is especially helpful for children who have math anxiety, by circumventing their "mental block" they can learn the tables without difficulties. They see it as fun and is a definite confidence booster. This brief summary does no justice to Ms. Monaghans book! Buy the book and see the results for yourself! I highly recommend it!
