Introduction To Housing

Synopsis

With individual chapters written by housing experts who have specialization within the field, this book is designed to be a collection of chapters/readings about various aspects of housing--an authorship approach that provides more credibility for each individual chapter than if one author had written the whole book. It also gives the book content that goes beyond rudimentary basics, and provides commentary on physical, social, psychological, economic, and policy issues. The book provides background about housing and addresses specific issues that may be critical to future housing decisions. Chapter topics cover the history of housing in America, influences on housing choice and behaviors, home environments and health, the housing industry, federal government and housing policies, interior space planning, housing affordability, and housing challenges for the 21st century. MARKET: For realtors, mortgage lending professionals, appraisers, housing counselors, demographers, home builders, interior designers, home remodelers.

Customer Reviews

Great!

This is a great textbook for an introductory housing class. The chapters are well-written and provide students with a great deal of good background information about various housing topics.
