# Making A Ripple: The 2x4 Canoe

## Synopsis

In pursuit of a craft for fishing and exploring the secluded lakes and streams of Northern Minnesota, the author has created Ripple; a sturdy, stable, comfortable and attractive canoe that can be built from four 16' 2x4s, fiberglass fabric and epoxy resin. If a cedar strip canoe is outside of your time, temperament, and price range, you may find the planked construction method described in this book to be an option well worth considering. Besides including the complete plans and step by step instructions, the author goes a step further and details the construction of a trailer and hitch system for pulling the canoe behind a bicycle. For about \$300 and 2-3 hours per day, for a total of about 40 hours, those with basic woodworking and fiberglassing skills can create this canoe and trailer, and perhaps soon find themselves making another one. L.O.A. 14'3", beam 36", rocker 2", beam at 2" waterline 30", bow height 16", weight 56-60 pounds

## Book Information

Paperback: 64 pages

Publisher: CreateSpace Independent Publishing Platform (February 21, 2015)

Language: English

ISBN-10: 1507734190

ISBN-13: 978-1507734193

Product Dimensions: 8.5 x 0.2 x 11 inches

## Customer Reviews

I was looking for a project that I could work on with my son and this was perfect! Incredibly detailed and great step by step instructions to even guide a novice like me.

I have built several boats over the years and am very impressed with this design and construction technique. The book nicely outlines the construction project in easy to follow steps accompanied by numerous photos. This is a beautiful boat that can be built by a beginner.

I have never built a canoe before and the 'ripple' canoe was just the right project to get my feet wet.

Lots of photos and clear instructions make this a great beginner's father-son woodworking project.
