Customer Reviews

The old adage that "knowledge is power" seems to resonate more so than ever today. Reading and learning gives kids that power, and in today's increasingly competitive world, the more knowledge kids have at their fingertips, the more prepared they will be to meet the challenges of our modern world. I wish to pass on my love of reading and exploring the world around us to all those new younger readers. So join me on my many voyages of discovery, learning about the many incredible things, people and creatures that make our world such a fascinating place. TJ Rob - www.TJRob.com

My son loves it.

I bought this and 4 other TJ Rob books in Kindle form to see if my grandchildren would like it. They did. They loved the pictures and the books provide good practice reading for youngsters. I enjoyed enhancing my own knowledge of animals through TJ Rob's books. I subsequently purchased 2 print editions for grandchildren living some distance away. When I visited the children, I was even more impressed with the presentation in printed form.

My six year old son is obsessed with sharks and megalodons. He recieved this book as a gift and really enjoyed it. The book had good pictures and larger text. We read it together, where he would read the words he knew and all of the headings and I read the rest of the text. He enjoyed all of the interesting facts found in the book. It could be a good teaching tool to discuss nonfiction text features with your child.
