Steve Jobs For Kids! Amazing People Of The World

Synopsis

This book will teach children ages 9 to 12 about the incredible life of Steve Jobs, the man who went from making computers in his parents' garage to starting Apple computers and inventing the iPhone, the iPad, iTunes, and many more wonderful devices. He even had a company that made the famous animated movies Toy Story, Finding Nemo, and Cars! Read this book and discover... * How Steve Jobs made it possible for ordinary people to have computers for the first time in history. * How Steve changed the way people listen to music...and even how they buy it. * How Jobs transformed the simple phone into a powerful computer you can hold in the palm of your hand. * How Steve fell in love with technology when he was just a child. * How a handwriting class in college changed Steve's life...and influenced the way Apple computers look today. * How Steve Jobs made computers easy to use. * How Steve revolutionized animated movies forever. * The big lessons that we can learn from Steve Jobs's life....and Much, Much More! So start reading and discover how Steve Jobs revolutionized the world with his ideas and what he can teach all of us about going for our dreams.

Customer Reviews

I'm 10 years old. I really enjoyed reading this book. I think Ian D. Fraser did a great job telling us the story of Steve Jobs. I think all children will enjoy reading this biography. I really do think it was amazing the way Steve Jobs changed the world by inventing Apple. Review by Arnav Goyal

This was great story to recite to my 8 year old son. He was too excited to see big size computers of early 80s. Overall, it was good read and summary of biography of great innovator and an entrepreneur!

No dislikes. I think Apple should read it. Don't read this review. Just read the book. It is awesome!!!!!!!!!!!!!! Seriesly.

Great story about an incredible man and easy enough for kids to understand how technology came to be as it is today!

Length: Print, 67 pages. Target Audience/Genre: Biography, Children's Books. Q - What was the Rank on the date this review was published? A - 315,331. Q - How was this book obtained? A - Purchased using Kindle Unlimited account. Q - Is this a book that I can read without having to read others first? A - Yes. Q - Are there a lot of typos/misspellings, grammatical errors or other editing failures? A - No. Q - Is this a fast, easy read or is it more of a leisure read? A - This is a fast, easy read for kids. Q - What sort of language does this writer use to amplify the points made? A - Plain, simple English. Q - My biggest pleasure or disappointment? A - This is an inspirational biography, but is not comprehensive. I would have liked seeing a mention that Homer Simpson's mother, Mona Simpson, was a result of Simpson's writer, Appel, who had once been a boyfriend of Steve Job's sister, Mona Simpson. Was it destiny that Jobs' name would become synonymous with the greatest cartoonist of a previous era? Bottom Line: A good introduction to our generation's closest approximation to Leonardo DaVinci, or Thomas Edison. Comments regarding your opinion of this book or of my review, whether favorable or unfavorable, are always welcome. If you buy the book based on my review and become disappointed, especially, I do want to know that and I want to understand how I can improve as a book reviewer. Just please be polite. Thank you.

I Liked it because it showed the history of computers and is technology which I Like and it was

awesome!
