# Numbers Colors Shapes (First 100)

## Synopsis

Your little one will soon learn their first numbers, shapes and colors with this bright board book. There are 100 color pictures which they will love to look at, and 100 simple first words to learn, too. The pages are made from tough board for hours of fun reading, and the cover is softly padded for little hands to hold.

Age Range: 1 - 3 years

Grade Level: Preschool and up

## Customer Reviews

Roger Priddy's passion for educating children through fun, informative and engaging books has led him to create some of publishing's most enduring and successful non-fiction early learning books. Roger lives in London and has three children, who have been the inspiration behind many of his best publishing ideas.

Love this style of books for my almost 2 year old toddler who loves the vibrant pictures in this book. Great way to learn new words, colors, numbers and new concepts as they even included some opposites in here. Love that they even included a routine page in as well to help teach toddlers about their daily routine.

My ten month old LOVES this book! He has four Priddy Baby books and they are some of his favorites. He loves to look through them, and in this book, he loves when we count the things on the different pages. His favorites are two rabbits, five strawberries, and six hens. We give him these books in the car and he stays quiet "reading" in his car seat. This book is well constructed and his little baby hands have an easy time handling it and turning the pages. These will be one of my go-to gifts for new parents in the future.

I've heard that its important to make very young children comfortable with numbers, as well as the alphabet. My adult kids could read as well as many adults by the time they were ten years old. But none of them are able to move as comfortable around the world of numbers. I 'hate' math, and now understand that I have passed this on to my children. So this book, along with another number based book, was purchased for my toddler grand daughter. She is in Nevada, while I reside in Australia, so I've only seen photos of her looking into the book. BUY IT AND HAVE THEM USE IT! Certainly can't hurt!

This is a smaller sized book than I expected. We received a similar book as a present and loved it. I figured it would make a great gift. I still think is ok, but the book is smaller in size than the one we received a few years ago

I bought these for my one year old son and he always picks these books up and he will either look at them by himself or he brings the book to me sits on my lap and we will read and look at it together, i will tell him the shape color or number and go over them again and again as he sits on my lap eager to hear what everything is.

My granddaughter loves this book. She is now 18 months, and I bought this for her for Christmas. She just can't get enough of it. We read it over and over, and the more her attention span grows, the more she learns about the things pictured inside. Ex: name (dog, etc.), it's number (how many), color, shape, even the sound it would make. An inexpensive little book that has great value. Good from 6 months and up.

We are in the process of an international adoption of a toddler boy. Though this book is intended for a younger audience, I think it will be perfect to use to help teach English vocabulary to our 3 year old. The illustrations are large, simple and colorful, and the book's construction is sturdy. Thanks for

offering at a great price.

Have 18 month old grandson that loves this series. Very well done I would recommend you buy full set of books by this author
