The author gives lots of good advice on how to buy the right meats, fish, and vegetable for the Paleo diet. My wife and I have a saying that we let our garden dictate our diet. This means that whatever is ripe and harvestable is what we eat that day. The author teaches to let the vegetable supply dictate your shopping list. He goes on to explain that just as my wife and I let what ripe in our garden dictate our diet, if you are buying your vegetables get what is in season and cost effective. There is also a lot of good advice on obtaining good sources of meat and other proteins. If you are interested in starting a successful Paleo diet then this book should be in your library.

This is a very educational book on nutrition and diet. It's very informative on explaining how Paleo lifestyle affects nutrition in general. You will learn key strategies that help make your weight loss trial successful. And you'll learn which foods you should and should not eat and why. It's well written and easy to understand.

You need to read and follow but I feel better and it is easier to change old bad habits than you think!

Just what I needed. Very informative and well organized. Recipes are good too.
