Clinical Anatomy Flash Cards

Synopsis

This clinically relevant anatomy flash card set is based on the concepts and full-color images in Moore and Dalley's Clinically Oriented Anatomy, Fifth Edition and Agur and Dalley's Grant's Atlas of Anatomy, Eleventh Edition. The card set is a convenient, flexible, portable, practical study and review tool for gross anatomy courses, USMLE Step 1 preparation, clinical anatomy review during clerkships, and for dental and allied health students. Organized and color-coded using the regional approach of Clinically Oriented Anatomy, the cards feature clinically relevant descriptions of structures, concise versions of the text's clinical "Blue Boxes", and correlating images. Realistic anatomic renderings from Grant's Atlas complement this clinically oriented material.

Book Information

Cards: 696 pages

Publisher: LWW (April 26, 2007)

Language: English

ISBN-10: 0781765099

Customer Reviews

I would have given these cards 5 stars had the cards been more in depth. There were many structures that I needed to know for my medical school anatomy class that weren't on these cards. That being said it wasn't very hard to just add lines and numbers to the front side and then the answer on the back. Great for studying from. Would purchase them again.

I did not receive these flashcards. Instead I received a small, green pocket book titled "Pocket Pediatrics". I no longer need the flashcards and I certainly don't need the pediatrics book.

I am a radiography student and therefore need to know my anatomy. These cards have been very

useful as I find anatomy hard to study sometimes. They have great detailed pictures which help to understand the three dimensional structures. I would recommend them!

Great purchase! Exactly, what I was looking for - right amount of information. Well organized, perfect size etc....I have been using them everyday and I think they are really helping!

I had the book for my gross anatomy class. So I bought the corresponding cards. These cards weren't bad they'll help you when you are reviewing your anatomy.

I commute to medical school and these flashcards were VERY helpful. They have very useful clinical information from the Moore and Dalley "blueboxes," which were often featured on our exams. Also, these cards have less extraneous, copious, unnecessary information that the Netters cards often contain.

This is the third set of flash cards i've came across and is by far the best of the 3, as not only are it's illustrations superb, but also it's contents... the other flash cards i came across only had muscles with very poor illustrations, whereas these flash cards had muscles, ligaments, nerves and other information that was very usefull... i'd say this is very much worth buying...

No complaints, well done.
