Mastering The Ultimate High Ground: Next Steps In The Military Uses Of Space

Synopsis

Assesses the military space challenges facing the Air Force and the nation in light of the findings and recommendations of the Space Commission. The author reviews the Air Force's involvement in space since its creation as an independent service in 1947; examines the circumstances that occasioned the commission's creation and the conceptual and organizational roadblocks that have impeded a more rapid growth of U.S. military space capability; and enumerates the challenges facing the Air Force with respect to space.

Customer Reviews

Under the auspices of Project Air force, RAND Corporation's Benjamin Lambeth has produced a thought-provoking analysis of America's military space challenges at the beginning of the twenty-first century. Plumbing nearly six decades of Air Force involvement in space, from the late 1940s through release of the Space Commission report in January 2001, he has pinpointed several longstanding conceptual and organizational impediments to more rapid growth of U.S. military space capabilities... The notes and bibliography for Mastering the Ultimate High Ground reveal good use of sources--books, articles, monographs, reports, documents, congressional testimony, oral histories, and unpublished presentations. Dr. Rick W. Sturdevant

Assesses the military space challenges facing the Air Force and the nation in light of the findings and recommendations of the congressionally mandated Space Commission.
