## Customer Reviews

Tom Brown, Jr. began to learn hunting and tracking at the age of eight under the tutelage of an Apache elder, medicine man, and scout in Toms River, New Jersey, and is the author of 16 books on nature. Recently, he was the technical advisor on *The Hunted*, a major motion picture starring Tommy Lee Jones and Benecio Del Toro. In 1978, Tom founded the Tracker School in the New Jersey Pine Barrens where he offers more than 25 classes about wilderness survival and environmental protection.

I own several survival books. This one is hands down my favorite. The very first chapter on attitude is brief yet it says a lot, it's right to the point and wakes you up immediately as to the importance of connecting with nature and tuning in to the earth and it's signs. It has lots of useful info and tips while in the wild but also has lessons for ways to learn even while at home or in a city. It has

practice tips to improve your skills and gives you challenges for yourself to make learning these skills fun. This is still a great book for those that just want a quick reference but it's REAL value is for those that will read this from start to finish. I highly recommend this one

Tom Brown has been an inspiration to me since I was small. The little anecdotes and the lessons from Stalking Wolf help to drive the points home, and the illustrations are good. A great read, I highly recommend it. It covers everything in the order you need it, and refers to other topics by page number where appropriate. For example, if you're reading the section on shelter, and it mentions cordage, the page number for how to make cordage is indicated in parentheses. Very well thought out, and easy to read and understand.

good reference

This is a guide I grew up reading, I learned a lot from it over the years. I feel it's one of the best and easiest to understand survival guides out there. I recently purchased 2 more copies, one each as permanent parts of my bugout and camping bags.

I've read lots of wilderness survival and survival books. Tom's book is right up there with the best. The only way to gain survival skills is to get out there and actually do it. If Tom's book isn't dog eared and dirty, it's because it's still on the shelf or in a box somewhere unread, where it's not going to do you any good.

I love it, truly a must have for both the beginner as well as the advanced. Thanks

Even though I have half a dozen other "survival" books, this one is still the best. Even my youngest grandson agrees. You will be glad you bought even a used copy, seeing as how it's been out of print for years.

I have Tom Brown's book on tracking and now this one. I highly recommend any of his books they are educational and a good read.
