Shipping Weight: 14.4 ounces

Average Customer Review: 4.3 out of 5 stars 5 customer reviews

Best Sellers Rank: #371,440 in Books (See Top 100 in Books) #110 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Pathophysiology](#) #986 in [Books > Health, Fitness & Dieting > Aging](#) #1541 in [Books > Textbooks > Science & Mathematics > Biology & Life Sciences > Biology](#)

Customer Reviews

A general -- yet substantive -- overview of the aging process, this text explores age-related changes and age-related dysfunctions common to each body system. Scientific terminology is kept to a minimum.

This book is designated to meet the needs of students pursuing a career in gerontology and associated fields such as social work, nursing, rehabilitative therapy, counseling, as well as serving as a reference for elderly people who wish to better understand the changes that are occurring in their own bodies.

LOVE IT

Great textbook, easy read and full of information.

This book arrived promptly and as advertised. It is an easy reading intro to aging biology textbook. I would purchase from this dealer again.

Lots and lots of highlighting and red ink underlining...wouldn't describe it as a "good" copy...but rather fair at best.

Even though this book is an old version, it is very useful and helpful. There are some highlights in this book.
