The Study Of Orchestration

Synopsis

A set of six enhanced CDs—recorded at the Eastman School of Music specifically for use with The Study of Orchestration, 3e—provides aural reinforcement of the examples in the text and workbook. In addition to state-of-the-art digital sound quality, the CDs contain HD-TV-quality video clips of musicians demonstrating orchestral techniques on a variety of instruments. --This text refers to an out of print or unavailable edition of this title.

Customer Reviews

Samuel Adler is Professor Emeritus at the Eastman School of Music and the Juilliard School of Music. He has been a visiting professor at many schools throughout the country and abroad, giving master classes in composition, orchestration, and conducting. Adler's compositions have been performed worldwide by orchestras including the New York Philharmonic, the Berlin Philharmonic, and the Chicago Symphony. His works have been recorded on numerous labels, including Naxos, Albany, RCA, Crystal, New World, and PARMA. Peter Hesterman is Professor of Music and coordinator of graduate studies in music at Eastern Illinois University. He is a graduate of the Capital University Conservatory of Music and earned M.M. and Ph.D. degrees from the Eastman School of Music of the University of Rochester. In addition to his work on The Music Kit, he is coauthor of the CD-ROM for The Study of Orchestration, Third Edition --This text refers to an out of print or unavailable edition of this title.

Any musician worth their salt should consider this volume. It is well written, with detailed

explanations of the instruments, and even includes examples from the scores of multiple works. A true resource!

Dear Publisher, Please update the software as soon as possible so that I can use it on my Mac.

Not bad though

Edited on 5/9/09 - my initial review (below) was pretty bad, perhaps unfairly so. With WW Norton's helpdesk I was able to figure out how to make the CDs work. Right now I'd give it 3 or 4 stars (but apparently that cannot be amended). Two tips for anyone reading this review: 1. Make sure to install the software contained on CD6. 2. The audio samples are *not* visible on a windows computer - the way this works is pop in the CD in any CD player or computer DVD drive that can play CDs, and play them back. (that is not in the manual - would have been nice to mention that somewhere). The book and the CD samples that go with it, are top notch for anyone seriously interested in orchestration - very detailed and thorough. One small nitpick on the classical guitar: the strings are not plucked with all fingers of the right hand (for right handed players) - only thumb (p or pulgar) through ring finger (a or anular) - the little pinkie is not normally used by classical guitarists, but occasionally by flamenco players for percussive effects or strums across all strings. Initial review: "Whoever developed the user interface should be killed - it forces you to listen to the opening tune which after a couple of times gets really annoying, it keeps asking for different CDs (insert disk 1, insert disk 6, insert disk 1, etc) for anything you want to do, and the audio samples are nowhere to be found ('cannot find composer'). (...)"

Great book and great audio examples, but the video software is not updated. It don't run in OS X El Capitan. Unfortunately there isn't information about what to do.

...but terrible that you have to insert the cd's to make use of them. I think I have found the solution. Use Windows Media Player and ripp the audio examples, and then convert the wave-files to mp3s. It takes some time, but I think it's worth the effort.

Doesn't work with OS X 10.11. Total waste of money for us.

You have to buy the workbook so you can get a better understanding of what you are reading. This

is a very well written book with lots of information
