Small and simplified. This is a great resource. I take it to work with me every night in the ED, and refer to it often. In downtime, I read through it and always learn something new. I am so glad I have it!

As a nursing student I feel like these are super helpful. I was entering my critical care rotation and decided to purchase this one so it could help me if I needed it. I love that its small and fits in my scrub pocket and isn't bulky! This has great tips and labs and meds that are common in critical and emergency care. From cardiac to Peds, its extremely helpful! I def recommend these for any nursing student or even new nurses who need a little help at times!

This always come in handy. My favorite use is the RSI and pediatric medication dosages. However, the new edition might need to better cross-referenced for the toxicology section. If you are an EMT or AEMT, this version may be too advanced. Only purchase this ACLS version after mastering the BLS version. This goes out to all those Super-Basics with 8+ years of experience.

I use it as an ACLS study guide.

SUPER Useful. If you are an EMT, Paramedic, or a medic student, this comes in handy in all sorts of situations. The color coded tabs help locate things very easily as well. My personal favorite part of this product is the section of commonly prescribed drugs. Some of the medications that patients are on can sound so obscure, but this book lets you find it super quick without needing to pull out your phone. Would definitely recommend to anyone in EMS!

I really enjoy this little thing, when I remember I have it. I like having drug dosages for critical meds right at my fingertips. It's a brief refresher for those details you might not encounter daily and need reminding about. I've known resident MDs who carry around this same pocket guide and love it.

I'm a 911 paramedic and I keep this very useful book in my pocket. The biggest help to me is the medication and drug areas. With how fast new medications are being pushed out it's good to be able to look them up fast while trying to help an injured or ill pt.

Water proof alcohol resistant. Good short quick reference guide. Some good lab levels, drugs and ACLS info. Well put together. I picked up the newer version. This one works quite well. And I see no problem with it falling apart
