Age Range: 3 - 5 years

Grade Level: Preschool - Kindergarten

Customer Reviews

This is a favorite of my 4 yr old. He loves all of the Lego books. We always get samples before we buy.

Cute, interesting and engaging little book that keeps the Grandkids entertained. Nice way to keep them happy and exercise their brains. A good way to encourage Imagination and learn new things in the process...that's is always a good thing!

Bought to replace one that belonged to school and was lost.

This is a nice way to encourage beginning reading, especially if someone likes Legos! I don't think I will be buying the other more advanced readers that have a Lego theme, because they are more

action packed.

Had to peak at this book before I wrapped it up for my son. He's in love with Legos & reading... so I figured this would be a great stocking stuffer. I know he won't be disappointed. Wanted a book that he could read on his own, without any help. And glancing through the book... he should be able to do just that.

An ok book for kids who enjoy the Legos, which most do. Personally, I think a child needs experience with easier books before they delve into these.

Bought this to replace a damaged library book, and appreciated the reasonable pricing.

Our son requested this after we borrowed it from the library. He recites it now verbatim and he just turned 3.
