excellent book, great deal and in great condition!! The shipping was really fast and the communication good. The handbok is a must if you are going to study anything in the television business.

Inexpensive. Great reference.

Essential for any TV production student and professional. Covers all the basics from script writing, shooting, editing, and pitching show ideas. A must have for any media enthusiast's library.

When I payed extra money to get A brand new never used book for college, I don't expect the book to be shipped in a Weight Watchers scale box with bo shipping material and the box having more tape than cardboard. Also the book also says not for Resale on the back of the book so someone made \$56 dollars for something they got for free. I hope .com has a beter time disguising whats new and whats USED on their website.

This textbook is a truly fantastic textbook if you want to learn about television production. There are no other textbooks like it.....it literally is the bible for all television production students. I have done several internships in the field of television and this textbook has covered a lot of what I have done in these internships. Its amazing how much of what I have read and seen in this textbook are also things that I worked with in my internships. It's simply the best textbook out there for television production students!!! Look into other works by Herbert Zettl, he is the Sigmund Freud of the

television world!

This is an excellent reference text for TV production students. I use this in my classes. The problem is it is very expensive and it is missing some key framing concepts (the rule of thirds). It can be redundant at times. As a whole though it is an excellent text.
