Jay Cassell, editorial director at Skyhorse Publishing and the editor of this compendium, has hunted all over North America. He has written for Field & Stream, Sports Afield, Outdoor Life, Petersen's Hunting, Time, and many other publications, and has published numerous books. He lives in Katonah, New York.

I bought this for my husband for Christmas and he loves it. It has so much information and he said if you can not find it in this book then it probably was never made. The only bad thing about the book is now he wants to go out and buy some new guns.

Significant listing of all firearms. If you can't find it in this book, it probably doesn't exist! Worth the bucks.

My father has bought one of these about every year for decades. Since his stroke, he has not bothered with them. As a birthday gift for him I decided to see if it was well received. Fantastic. In his lap each visit for two months now!

This is a very good reference for shooters.

does what it says on the box. A very comprehensive if very brief rundown on what's on the market

This is my second copy purchased over the years. It covers almost every gun but does not cover all the variants. For example the Browning Hi Power 9mm is covered but just the original version, not the Mark II or Mark III. The info on each gun is very basic, things like weight, dimensions etc. I do love the fact that it has a picture of each firearm and all the various other accessories like scopes, red dots etc. Great book for looking up a gun that is mentioned by name but your not familiar with. Also a must have if your hanging around with shooting buddies to settle arguments.

One must keep abreast of new hunting tools. You can never have too many guns.

Get this annually if you like to see what's out there and what's coming out in the firearm industry. It's a huge book and it's a good read, with plenty of pictures so it's easy to identify firearms you may be interested in. Every year the book seems to get bigger and better, and this edition was no different.
