Life In A Cave (Sutton Life)

Synopsis

What was it like to be a caveman? What sort of house would you live in? What sort of clothes would you wear? Paul Jordan takes us back in time to see what it was really like to live in prehistoric times, what kind of animals we would have shared the land with, and what our daily life would involve. How would you have managed in this strange and difficult world?

Customer Reviews

I love researching our skillful past, I study archeology, biblical archeology, world archeology and the articles that describes new finds all over the world. The books on cave living (survival) educates my curiosity and the whole hunger to understand. The author gave me evidence , insightful ideas in such a way that for me it was easy to read and carefully created. What's next Sutton Life ?

Have read several books on early man. This would be an excellent "first" for either the casual researcher or serious student. It is a quick read leaving a nice broad overview of when and where 'man' appeared and developed. I particularly liked the inclusion of information regarding the times

and fluctuations of the ice ages, interstadials and interglacials.

Small book that packs a lot of punch. Good read and can fit in small places. Excellent delivery

I haven't yet finished the book, but, if your into this kind of history, you should like this one

Well Done, good research and excellent narative

Written so that a lay person can understand it. I would recommend this book to anyone who is interested in this period of human life.

quick read. written in a very understandable form. Good addition for anyone interested in that single element of the human past. Worth the time to read and a good addition to a collection of the history of man.
