For this revision, The National League for Nursing conducted a nurse educator practice analysis, identifying changes in the job-related responsibilities of the nurse faculty role. ## Customer Reviews

The National League for Nursing Certification Commission Certification Test Development Committee is comprised of expert researchers, educators, and professionals who collaboratively design standards and national certification exams for professional nurses.

I purchased this book in preparation for taking the CNE exam. Please save your money. It's like a little brochure rather than a book! All information contained within this book can be found on the NLN's website for free.

Not worth the printed pages as very little was useful. Internet offers same information. Needed for desk but don't recommend purchasing as expensive for the small amount of content. Nurses should not be required to purchase and make publishers rich, sad but this is big business I don't endorse.

Helpful

Ordered for class. Good information to have on hand in print edition.

Good information, but for the money, it is more like a manual. Short, only 27 pages and that included inter and references.

required for nursing school course, but essential for nursing education in every area that it happens

Wish I had read the reviews before purchasing. Not worth the amount spent on this item

I was required to buy it for school, but it is basically a pamphlet. If you can avoid buying it, do. It's only 28 pages and only 20 of those are actual content.
